

Ohio State University  
Department of Physics  
**Phun With Physics**  
Ohio State Fair Youth Center

We're not just blowing smoke!  
Visit OSU's Phun with Physics booth for some **extreme science fun**.

Be dazzled with some **cool liquid nitrogen experiments**  
that are sure to rock the building.

Get prepared for the Fair's roller coaster with our  
**Spinning Barf Wheel of Science**.

We will drive home the point about pressure when you lay down on our **bed of nails**  
(kids this is your chance to walk all over your parents).

See **diet coke and mentos** reach new heights  
and get pumped launching a rocket to the Youth Center ceiling.

Push the pedal to the metal on our popular **Power Bicycle of Science** and compare your  
endurance to famous Buckeye (and NFL) football players that rode this same bike in  
their classes.

Witness our **levitating superconductor** with no strings attached and be amazed as  
Kooky Katie breaks a solid board with her bare hand and then boogie with her Phun  
Phriends in the super high energy **particle dance!**

**Radically fun, in your face science,**  
shows that always end with a bang and a mess, but don't tell anyone that you might be  
learning something as well.

**Let's go Bucks**  
Don't forget to bring your camera.
